Among the rich countries life expectancy is not related to national differences in average income

Source: Wilkinson & Pickett, *The Spirit Level* (2009)

...but life expectancy is related to income *within* rich societies

How much richer are the richest 20% than the poorest 20%?

Income gaps

How many times richer are the richest fifth than the poorest fifth

Health and Social Problems are Worse in More Unequal Countries

Index of:

- Life expectancy
- Math & Literacy
- Infant mortality
- Homicides
- Imprisonment
- Teenage births
- Trust
- Obesity
- Mental illness – incl. drug & alcohol addiction
- Social mobility

Health and Social Problems are not Related to Average Income in Rich Countries

Index of:

- Life expectancy
- Math & Literacy
- Infant mortality
- Homicides
- Imprisonment
- Teenage births
- Trust
- Obesity
- Mental illness – incl. drug & alcohol addiction
- Social mobility

Child Well-being is Better in More Equal Rich Countries

Child-Wellbeing is Unrelated to Average Incomes in Rich Countries

Levels of Trust are Higher in More Equal Rich Countries

Levels of Trust are Higher in More Equal US States

The Prevalence of Mental Illness is Higher in More Unequal Rich Countries

Infant Mortality Rates are Higher in More Unequal Countries

Drug Use is More Common in More Unequal Countries

Index of use of: opiates, cocaine, cannabis, ecstasy, amphetamines

Teenage Birth Rates are Higher in More Unequal Rich Countries

Homicide and income inequality: US States and Canadian Provinces

Source: Daly M, Wilson M, Vasdev S. Income inequality and homicide rates in Canada and the United States. *Canadian Journal of Criminology* 2001; 43: 219-36.

Rates of Imprisonment are Higher in More Unequal Countries

Social mobility is higher in more equal countries

Intergenerational income mobility data from: Blanden J. (2009) Centre for Economic Performance, LSE. Paper No' CEEDP0111.

Almost everyone benefits from greater equality.

Usually the benefits are greatest among the poor but extend to the majority of the population

Infant Mortality by Social Class: Sweden and England & Wales

Literacy Scores of 16-25 year olds by Parents' Education

Health and Social Problems are Worse in More Unequal Countries

Index of:

- Life expectancy
- Math & Literacy
- Infant mortality
- Homicides
- Imprisonment
- Teenage births
- Trust
- Obesity
- Mental illness – incl. drug & alcohol addiction
- Social mobility

Why are we so sensitive to inequality?

Psychosocial risk factors for ill health

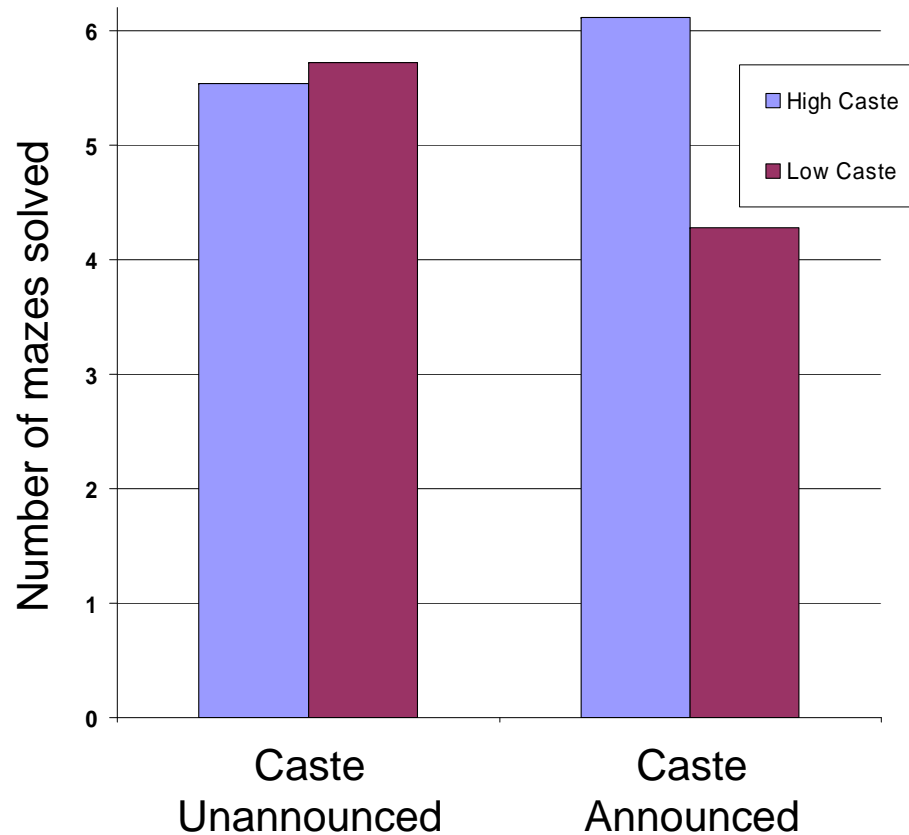

- **Low social status**
- **Weak social affiliations**
- **Stress in early life (pre- and postnatally)**

What kind of stress most reliably raises cortisol levels?

Stereotype Threat

The effect of caste identity on children's performance

Gilligan J. *Violence: Our Deadly Epidemic and its Causes.*

(G .P. Putnam 1996)

" ...the prison inmates I work with have told me repeatedly, when I asked them why they had assaulted someone, that it was because 'he disrespected me', or 'he disrespected my visit' (meaning 'visitor'). The word 'disrespect' is central in the vocabulary, moral value system, and psychodynamics of these chronically violent men that they have abbreviated it into the slang term, 'he dis'ed me.'" p.106

A few pages further on Gilligan continues:-

"I have yet to see a serious act of violence that was not provoked by the experience of feeling shamed and humiliated, disrespected and ridiculed, and that did not represent the attempt to prevent or undo this "loss of face " - no matter how severe the punishment, even if it includes death." p.110

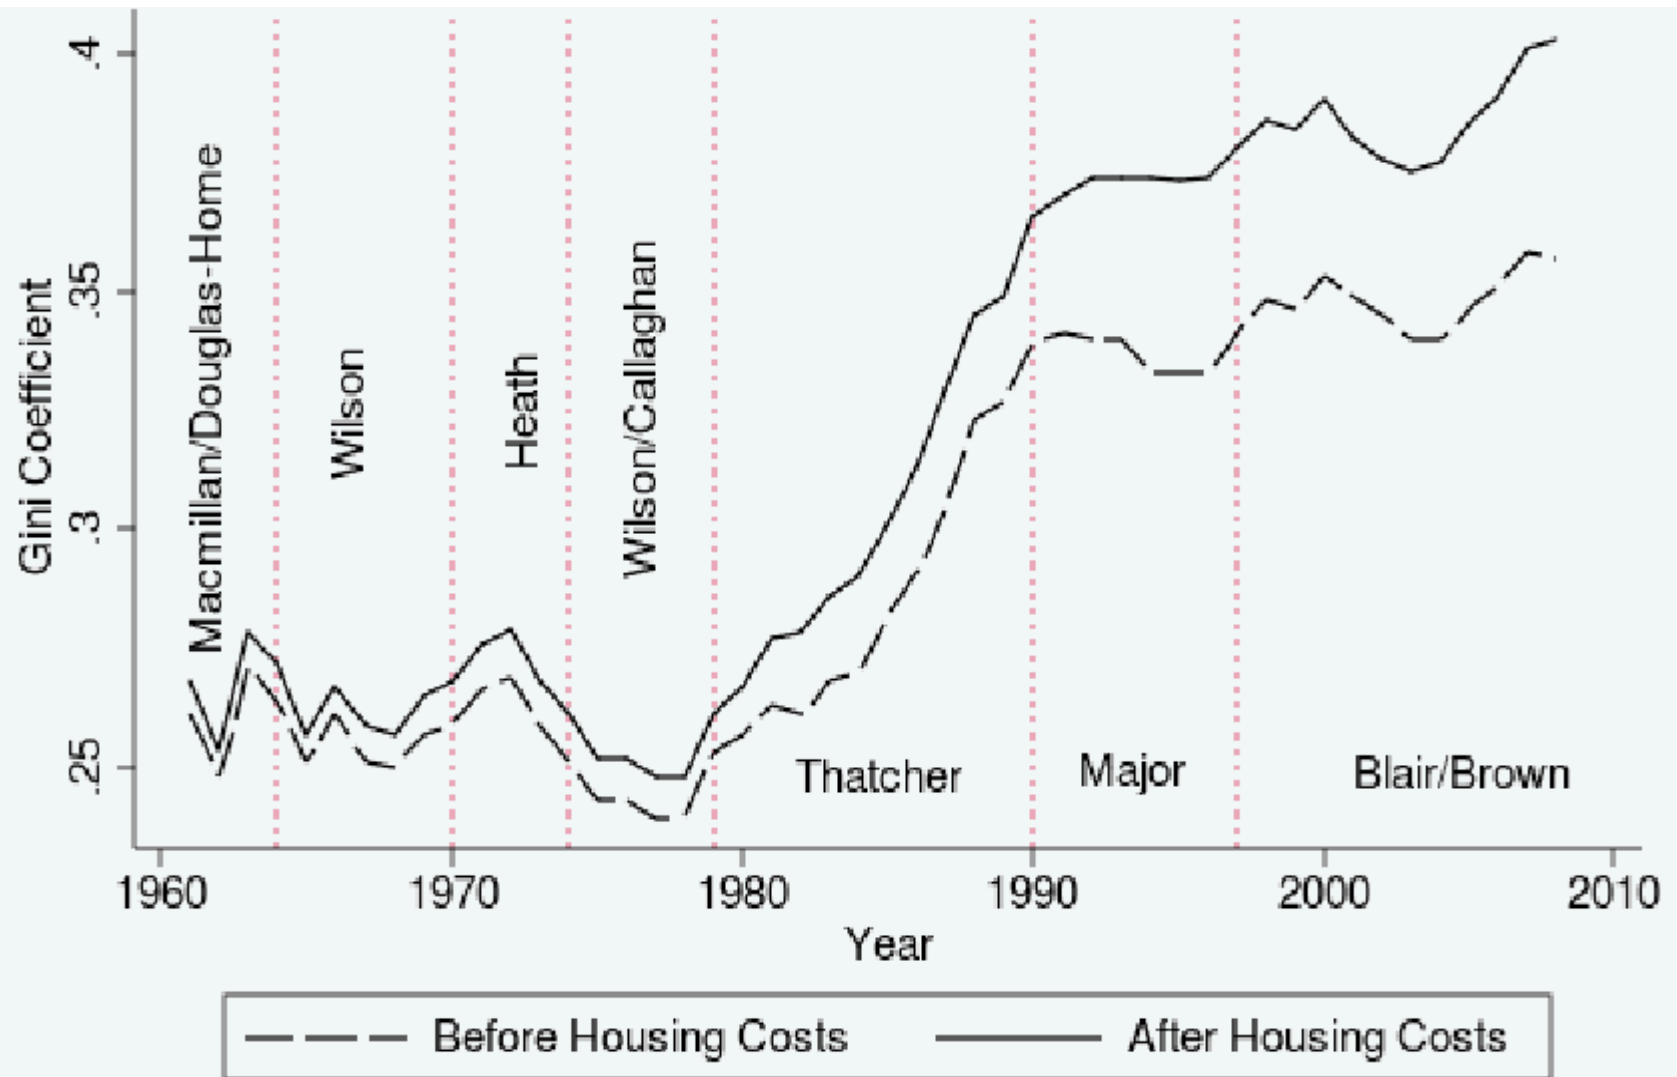

Social Status and Friendship

Two sides of the same coin:

Social status (dominance hierarchies, pecking orders) are orderings based on power, coercion and privileged access to resources – regardless of the needs of others.

Friendship, in contrast, is based on reciprocity, mutuality, social obligations, sharing and a recognition of each other's needs.

Inequality (Gini) Great Britain 1961 - 2008
